二、代码说明

1. Module.vb

Module Module1

```
Public arr() As Integer = {0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0}
```

```
Public N%, i%, j%, imin%, xmin%, imax%, xmax%, x%, isum%, iavg%
```

(1)定义最小值函数

```
Public Function min(ByVal arr, ByVal N, ByRef i, ByRef x)
```

```
Dim k%
```

```
i = arr(0)
```

```
For k = 1 To N - 1
```

```
    If arr(k) < i Then
```

```
        i = arr(k)
```

```
        x = k
```

```
    End If
```

```
Next
```

```
End Function
```

(2)定义最大值函数

```
Public Function max(ByVal arr, ByVal N, ByRef i, ByRef x)
```

```
Dim m%
```

```

        i = arr(0)
    For m = 1 To N - 1
        If arr(m) > i Then
            i = arr(m)
            x = m
        End If
    Next
End Function

Public Function sum(ByVal arr, ByVal N, ByRef isum)
    For j = 0 To N - 1
        isum += arr(j)
    Next
End Function
End Module

```
